This is the twenty third weekly newsletter update regarding the summer 2024 construction projects at Minot International Airport.

WILDLIFE HAZARD REMOVAL PROJECT

- Landscaping, seeding, and mulching work has been substantially completed in the Phase 1 area (southwest quadrant of the airport) and Phase 2 area (southeast quadrant of the airport).
- Phase 3 construction in the northeast quadrant of the airport is proceeding with airfield ditch grading, filling in of wetlands, topsoiling, and landscaping.
- Retention basin A storm sewer pipe installation continues at the south end of the airport.
- Project Lookahead**
 - Next week, the contractor will continue Phase 3 topsoiling and landscaping. Retention basin A work will include storm sewer pipe installation, backfilling, and site restoration.
 - Project construction is anticipated to reach substantial completion across all phases by late-November, weather permitting.

Please check NOTAMs for up-to-date information regarding the airfield status.
