

# Minot International Airport

## CONSTRUCTION NEWSLETTER: WEEK 6

This is the sixth weekly newsletter update for the Taxiway C Rehabilitation & Edge Lighting project at the Minot International Airport.

### PROJECT UPDATE – PHASE 2A

**Taxiway C3 (between Taxiway B & Taxiway C) will be closed for construction through September 29th.**

After the holiday weekend, Taxiway C3 was closed Tuesday morning between Taxiway B and Taxiway C to kick off Phase 2A work. Like Phase 1, work items include pavement rehabilitation, new edge lighting, and guidance signage.

The week began with traffic control installation and the removal of the existing edge lighting system within the Phase 2A work area. Pavement removals via milling were completed on Wednesday. Bituminous paving has occurred through the end of the week and is expected to be completed for the Phase 2 work area by tonight (Friday). Finally, edge lighting and signage installation is well underway following electrical removals earlier in the week.

**Please note that the taxiway edge lighting system serving Taxiway C3, Taxiway B, and Taxiway C1 will be out of service during Phase 2.**

### PROJECT LOOK AHEAD – PHASE 2A & 2B

Next week will primarily consist of continued work on the new taxiway edge lighting system within the Phase 2 work area. This includes scheduled electrical work within the Taxiway Object Free Area (TOFA) of Taxiway C on Taxiway C3, denoted as Phase 2B. Phase 2B will include limited daytime closures of the north portion of Taxiway C to facilitate this work.

The following additional NOTAMs are scheduled Tuesday, Sep. 9 and Wednesday, Sep. 10 from 7:00AM – 9:00PM:

- CLOSE Taxiway C (between Taxiway C1 & Runway 8/26)
- CLOSE Taxiway C3 (between Runway 13/31 & Taxiway C)

Phase 3 is scheduled for the week of September 15th and will include closures of Taxiway B (between Taxiway C & Taxiway B2) and Taxiway C3 (between GA Ramp & Taxiway C). During Phase 3, GA Ramp access will be limited to Taxiway B2 only.

**Please note that the above schedule is weather dependent.  
Always check NOTAMs for the most up-to-date airfield status.**
